

Norway's Second City Ditches Windows for Linux

ZDNet UK, 2004-06-15

The city of Bergen is migrating its education and health services from Unix and Windows to a system built around SuSE Linux

"In a move that echoes an earlier high-profile migration by the German city of Munich, authorities in the Norwegian city of Bergen have opted to replace existing core Windows and Unix systems with Linux.

"The two-phase rollout will see the 20 existing Oracle database servers running on HP-UX that support the City's health and welfare applications replaced with SuSE Linux Enterprise Server 8 running on HP Integrity Itanium 64 bit servers..."
