

Apache Web server 10 years

LinuxReviews.org

Apache, a free web server for Linux and Windows, is now the most popular web server on the net with nearly 70 percent market share.

The Apache Web Server has now been serving web sites for 10 years.

Apache is now, according to Netcraft, used by more than 40 million web sites and has close to 70 percent market share.

And yes, Linux Reviews is powered by Apache...
