

# SUSE Linux 10.0 OSS Beta 2 has been released

*LR*

SUSE has now announced that SUSE Linux 8.2 is dead and discontinued. SUSE Linux 10.0 OSS Beta 2 is now released and available from [opensuse.org](http://opensuse.org)

[openSUSE.org](http://openSUSE.org), the current Novell pr jippo, is {now available for download <http://opensuse.org/index.php/Download>] along with developer builds. SUSE Linux 10.0 OSS Beta 2 can also be downloaded using BitTorrent.

openSUSE aims to become the Linux distribution for everybody, a distribution anyone can download and use as simple as pie. And the OpenSuse distribution will be totally free - just like Fedora, Gentoo and many other distributions, but un-like the "old"-Suse, Libranet and Mandriva Linux.

OpenSUSE is powered by the Wiki software MediaWiki.
