

Bitlbee 0.99 released

LR

As promised, here's the 0.99 release. Pretty soon indeed, and if nothing bad happens with this one, there will be 1.0 soon.

Bitlbee allows you to talk to almost anyone using any IM program like MSN, ICQ and AIM from any IRC client program.

It can give you a great communication suite and works supreme together with screen, e/x/aterm and irssi/epic/bitchx.
