

# Women are irrelevant to the free software community

*lr*

Barely one percent of all commits to free software projects are done female contributors.

The KDE commit digest sex percentages are:

- 89 % Male
- 9.51 % (unknown)
- 1.34 % Female

\* [KDE commit digest Issue 147 25th January 2009](#)

No wonder women find GNU/Linux so hard to use.
